## HALL Xtreme Hose

HALL Technical Services' Xtreme PCA Hose is the latest in new hose technology to combine extremely durable lightweight materials into a superior ramp ready PCA hose. This Xtreme PCA Hose is designed for the tough ramp environment with reinforced seams that are lock stitched with new improved high strength UV protected polyester thread to prevent breakage. The Xtreme outer shell fabric prevents wicking moisture and does not degrade when exposed to Skydrol and is highly UV resistant for superior service life. You will save money over the product life switching to the HALL Xtreme Hose.

### Features

#### OUTER SHELL

The high strength yellow ballistic nylon outer shell is constructed for superior abrasion resistance compared to other lightweight products available today. The material is highly resistant when exposed to Glycol/Skydrol and will not degrade after multiple exposures. Our outer shell is also UV stabilized for long term protection from the sun and will continue to be high visibility yellow!

#### INSULATION LAYER

The middle insulation layer is a polypropylene fabric that will reflect radiant heat, will not absorb moisture, inhibit growth of fungi and bacteria, and flex and bend without cracking. This material is a great combination of thermal resistance and lightweight construction compared to industry standards.

#### INNER LINER

The proprietary high strength inner liner consists of rip resistant coated nylon. The material construction is tightly woven to minimize tears and rips and withstand the heavy pressure and wear seen by this product on the ramp. This extremely durable inner liner will allow this hose to exceed life expectations and keep this PCA hose in service and on the ramp.

### Specifications

Temperature	-20° to 180° (-29° C to 82° C)
Diameter	14" (other available upon request)
Length	10', 20', 25' (custom lengths available upon request)
Color	High visibility yellow
Optional Ends	Soft cuff, velcro cuff, fold over cuff
